Miller Thomson on Estate Planning offers insight into multiple planning issues across Canada, including Québec, such as: trusts, estate administration, insurance planning, charitable planning, disability planning, business succession and corporate restructuring, and the legal implications of immigration and emigration and other cross-border issues.

The book identifies the many factors at play when creating an estate plan:

- Directing assets to the desired beneficiaries, through the estate or otherwise
- Imposing terms and conditions on gifts where appropriate
- Minimizing the tax implications of the plan so as to provide the most value to the ultimate beneficiaries
- Minimizing administrative and court costs on death and incapacity
- Protecting the estate from creditors and other claimants
- Adapting to changes in family and financial circumstances

All relevant legal aspects relating to ownership and disposition of, and succession to, property in Canada are covered – including the rights, entitlements or expectations of various parties connected to the client.
