**Preface** ........................................................................................................ iii  
**Table of Cases** ............................................................................................ xix

**Chapter 1  International Environmental Law** ................................................. 1  
  Introduction ..................................................................................................... 1  
  Part I — Sources of International Law .......................................................... 2  
    Meinhard Doelle, adapted and updated from From Hot Air to Action?  
    Climate Change, Compliance and the Future of International  
    Environmental Law .................................................................................... 2  
    Notes and Questions .............................................................................. 11  
  Part II — Relevance and Application of International Law in the Canadian  
    Environmental Law Context ..................................................................... 12  
    Elizabeth Brandon, “Does International Law Mean Anything in  
    Canadian Courts?” .................................................................................... 12  
    Notes and Questions .............................................................................. 24  
    114957 Canada Ltée (Spraytech, Société d’arrosage) v. Hudson (Town) ...... 24  
    Notes and Questions .............................................................................. 26  
  Part III — Domestic Application of the Precautionary Principle: A Case Study ...... 28  
    Chris Tollefson, “A Precautionary Tale: Trials and Tribulations of the  
    Precautionary Principle” .......................................................................... 29  
    Notes and Questions .............................................................................. 39  
  Part IV — Key International Environmental Regimes to Watch ....................... 40  
    Convention on Biological Diversity (CBD) ................................................. 41  
    Elli Louka, International Environmental Law, Fairness, Effectiveness  
    and World Order ...................................................................................... 41  
    Notes and Questions .............................................................................. 43  
    The Basel Convention .............................................................................. 44  
    Ifeoma Onyerikam, “Achieving Compliance with the Basel Convention  
    on Transboundary Movement of Hazardous Wastes” .............................. 44  
    Notes and Questions .............................................................................. 47  
    World Trade Institutions ........................................................................... 47  
    Elli Louka, International Environmental Law, Fairness, Effectiveness  
    and World Order ...................................................................................... 47  
    Notes and Questions .............................................................................. 53  
    International Investment Agreements ......................................................... 54  
    Chris Tollefson & W.A.W. Neilson, “Investor Rights and Sustainable  
    Development” .......................................................................................... 54  
    Notes and Questions .............................................................................. 58  
    Kyra Bell-Pasht, Counsel, Canadian Environmental Law Association,  
    Submission to Government of Canada, regarding the Final  
    Strategic Environmental Assessment of the Canada-China FIPA ............ 60  
    Notes and Questions .............................................................................. 63  
    The Global Climate Change Regime .......................................................... 64  
    Notes and Questions .............................................................................. 66
Chapter 2  The Common Law ................................................................. 69

Introduction ..................................................................................... 69

Part I — Applying Traditional Tort Law in Environmental Cases .......... 70
  Palmer v. Stora Kopparbergs Bergslags AB ...................................... 73
  Notes and Questions ....................................................................... 81
  Cambridge Water Co. v. Eastern Counties Leather Plc. .................... 82
  Notes and Questions ....................................................................... 91
  Smith v. Inco Ltd. ........................................................................... 93
  Notes and Questions ....................................................................... 110
  Thomas v. Rio Tinto Alcan Inc. ..................................................... 113
  Notes and Questions ....................................................................... 125

Part II — Understanding the Limits of Traditional Torts ....................... 126
  Lynda M. Collins, “Material Contribution to Risk in the
  Canadian Law of Toxic Torts” ...................................................... 126
  Notes and Questions ....................................................................... 137

Part III — Class Action Suits and Environmental Tort Claims ............... 138
  Christie Kneteman, “Revitalizing Environmental Class Actions:
  Quebeçois Lessons for English Canada” ....................................... 139
  Notes and Questions ....................................................................... 145

Part IV — Tort Litigation Aimed at Deterring Public Participation ........... 146
  Michaelin Scott & Chris Tollefson, “Strategic Lawsuits Against
  Public Participation: The British Columbia Experience” ............... 147
  Notes and Questions ....................................................................... 151
  Ontario Anti-SLAPP Legislation .................................................... 153
  1704604 Ontario Ltd. v. Pointes Protection Association .................... 155
  Notes and Questions ....................................................................... 164

Part V — Towards a Recognition of Common Law Public Rights in the
  Environmental Context ................................................................ 165
  Justice B.J. Preston, The Role of the Judiciary in Promoting
  Sustainable Development: The Experience of Asia and the Pacific .... 166
  British Columbia v. Canadian Forest Products Ltd. ......................... 167
  Notes and Questions ....................................................................... 173
  Jerry V. DeMarco, Marcia Valiante & Marie-Ann Bowden, “Opening
  the Door for Common Law Environmental Protection in Canada:
  The Decision in British Columbia v. Canadian Forest Products Ltd.” .... 174
  Notes and Questions ....................................................................... 177
  Burns Bog Conservation Society v. Canada (Attorney General) ............ 178
  Notes and Questions ....................................................................... 183
  Andrew Gage, “Asserting the Public’s Environmental Rights” .......... 184
  Notes and Questions ....................................................................... 189

References and Further Readings ..................................................... 190

Chapter 3  Jurisdiction over the Environment ........................................ 193

Introduction ..................................................................................... 193
Part I — Division of Powers and Interpretive Doctrine Relevant to Environment Cases ................................................................. 194
Division of Powers Overview .................................................................. 194
Meinhard Doelle, adapted and updated from the constitutional chapter in The Federal Environmental Assessment Process: A Guide and Critique ................................................................. 194
Interpretive Doctrine ............................................................................... 200
Morton v. British Columbia (Minister of Agriculture & Lands) ........... 200
Notes and Questions ............................................................................. 208

Part II — Leading Cases on Federalism and the Environment ............ 210
R. v. Crown Zellerbach Canada Ltd. ....................................................... 211
Notes and Questions .............................................................................. 219
Friends of the Oldman River Society v. Canada (Minister of Transport) .... 220
Notes and Questions .............................................................................. 228
Canada (Procureure générale) c. Hydro-Québec ................................... 229
Notes and Questions .............................................................................. 247
Syncrude Canada Ltd. v. Canada (Attorney General) .............................. 247
Notes and Questions .............................................................................. 254

Part III — The Politics and Practicalities of Jurisdiction over the Environment .... 254
William R. MacKay, “Canadian Federalism and the Environment:
The Literature” .................................................................................... 255
Notes and Questions .............................................................................. 264

Part IV — Emerging Issues in Jurisdiction over the Environment .......... 265
Aboriginal Rights and Jurisdiction over the Environment ....................... 266
Tsilhqot’in Nation v. British Columbia .................................................... 269
Notes and Questions .............................................................................. 280
Municipal Jurisdiction ........................................................................... 281
114957 Canada Ltée (Spraytech, Société d’arrosage) v. Hudson (Town) ...... 282
Notes and Questions .............................................................................. 290
Howard M. Epstein, “Subsidiarity at Work — The Legal Context for Sustainability Initiatives at the Local Government Level: How an Environmental Agenda Could Be Advanced by Canadian Municipalities” .................................................. 290
Notes and Questions .............................................................................. 294

Part V — Case Study: Trans Mountain Pipeline Expansion Project ....... 295
Overview ............................................................................................... 295
Scope of Municipal Jurisdiction ............................................................ 297
Notes and Questions .............................................................................. 298
Judicial Review of Provincial Government Action .................................. 299
Notes and Questions .............................................................................. 301
Challenges to Federal Pipeline Approval: Pipelines and the Division of Powers Going Forward ..................................................... 301
Notes and Questions .............................................................................. 303

References and Further Readings ........................................................... 304

Chapter 4 Environmental Regulation .................................................... 307
Introduction ............................................................................................ 307
Part I — Environmental Regulation in Canada: Some Context and Perspective .... 308
D. Paul Emond, “The Greening of Environmental Law” .......................... 308
Notes and Questions ..................................................................................... 313
R. Michael M’Gonigle, et al., “Taking Uncertainty Seriously: From Permissive Regulation to Preventative Design in Environmental Decision Making” ..................................................................................... 313
Notes and Questions ..................................................................................... 322
Stepan Wood, Georgia Tanner & Benjamin J. Richardson, “Whatever Happened to Canadian Environmental Law?” ..................................................................................... 323
Notes and Questions ..................................................................................... 326

Part II — Environmental Standard Setting ..................................................................................... 326
Chris Tollefson, Fred Gale & David Haley, Setting the Standard ..................................................................................... 327
Notes and Questions ..................................................................................... 333

Part III — The Emerging Governance-based Approach to Environmental Regulation ..................................................................................... 333
Michael Howlett, “Policy Instruments, Policy Styles, and Policy Implementation: National Approaches to Theories of Instrument Choice” ..................................................................................... 334
Kathryn Harrison, “Talking with the Donkey: Cooperative Approaches to Environmental Protection” ..................................................................................... 335
Jody Freeman & Daniel Farber, “Modular Environmental Regulation” ..................................................................................... 341
Chris Tollefson, Fred Gale & David Haley, Setting the Standard ..................................................................................... 344
Neil Gunningham, “Beyond Compliance: Next Generation Environmental Regulation” ..................................................................................... 347
Notes and Questions ..................................................................................... 350

Part IV — Environmental Regulation, Innovation and Economic Performance ..................................................................................... 351
Stefan Ambec et al., “The Porter Hypothesis at 20: Can Environmental Regulation Enhance Innovation and Competitiveness?” ..................................................................................... 351
Notes and Questions ..................................................................................... 363

Part V — An Overview of Canadian Regulatory Models ..................................................................................... 363
Fisheries Act ............................................................................................................. 364
Habitat Protection: Subsection 35(1) ............................................................................. 364
Pollution Prevention: Section 36 ............................................................................. 365
R. v. MacMillan Bloedel (Alberni) Ltd. ............................................................................. 366
Fletcher v. Kingston (City) ..................................................................................... 367
Notes and Questions ..................................................................................... 368
Ian Richler, “R. v. Kingston and the Criminalization of Harmless Pollution”, Case Comment ..................................................................................... 368
Notes and Questions ..................................................................................... 371

Canadian Environmental Protection Act (CEPA) ..................................................................................... 371
Meinhard Doelle, adapted from Canadian Environmental Protection Act and Commentary ..................................................................................... 371
Great Lakes United v. Canada (Minister of Environment) ..................................................................................... 374
Notes and Questions ..................................................................................... 384
Parliamentary Review of CEPA ............................................................................. 385
Jolson Lim, “Feds Shy Away from Endorsing Regulatory Overhaul for ‘High-Concern’ Chemicals in CEPA Reform” ..................................................................................... 385
Notes and Questions ..................................................................................... 388

References and Further Readings ............................................................................. 388
# TABLE OF CONTENTS

**Chapter 5** Compliance and Enforcement ........................................... 391

Introduction ................................................................................................................................. 391

**Part I — Regulatory Compliance and Enforcement Strategies** ........................................... 392

Introduction ................................................................................................................................. 392

Joseph Castrilli, “Canadian Policy and Practice with Indicators of Effective Environmental Enforcement” ................................................................. 392

Notes and Questions ...................................................................................................................... 395

Regulatory Enforcement: The Canadian Record ................................................................. 395

Jerry V. DeMarco & Toby Vigod, “Smarter Regulation: The Case for Enforcement and Transparency” ................................................................. 395

Ecojustice Canada, Environmental Enforcement by Canada’s Federal Government (The Essentials) ................................................................. 397

Office of the Auditor General of Canada, 2018 Fall Reports of the Commissioner of the Environment and Sustainable Development........... 400

Notes and Questions ...................................................................................................................... 401

**Part II — Cooperative versus Adversarial Enforcement Approaches** ................................. 402

Matthew D. Zinn, “Policing Environmental Regulatory Enforcement: Cooperation, Capture and Citizen Suits” ................................................................. 402

Notes and Questions ...................................................................................................................... 407

**Part III — Selected Issues in Environmental Law Enforcement** ........................................... 408

The Role of the Criminal Law as an Enforcement Tool........................................................... 408

Stanley David Berger, “The Future of Environmental Prosecutions in Ontario” ......................... 408

The Role and Nature of the Regulatory Offence ................................................................. 410

John Swaigen, “Absolute Liability Revisited: Lévis v. Têtreault” ............................................. 410

Notes and Questions ...................................................................................................................... 411

*Lévis (Ville) c. Têtreault* ............................................................................................................ 412

The Prosecution and Defence of Environmental Charges ......................................................... 413

Corporate Regulatory Liability .................................................................................................. 413

*R. v. Syncrude Canada Ltd.* ...................................................................................................... 414

Shaun Fluker, “*R. v. Syncrude Canada*: A Clash of Bitumen and Birds” ................................. 423

Notes and Questions ...................................................................................................................... 429

Directors’ and Officers’ Liability ................................................................................................. 429

*R. v. Bata Industries Ltd.* ........................................................................................................... 430

Notes and Questions ...................................................................................................................... 435

Sentencing in Environmental Cases .......................................................................................... 435

*R. v. United Keno Hill Mines Ltd.* ............................................................................................ 435

Elaine L. Hughes & Larry A. Reynolds, “Creative Sentencing and Environmental Protection” ........................................................................................................... 440

Notes and Questions ...................................................................................................................... 447

The Emerging Role of Administrative Monetary Penalties (AMPs) ......................................... 448

Stepan Wood & Lynn Johannson, “Six Principles for Smart Regulation” ..................................... 448

Notes and Questions ...................................................................................................................... 449

The Role of Adaptive Management in Compliance and Enforcement .................................... 450

*Taseko Mines Limited v. Canada (Environment)* .................................................................... 458

Notes and Questions ...................................................................................................................... 463
The Interplay between Statutory Remediation Orders and Bankruptcy/Insolvency Law ................................................................. 463
AbitibiBowater Inc., Re ............................................................................. 464
Notes and Questions ............................................................................ 477

Part IV — Citizen Enforcement ..................................................................................... 477
Citizen Suits and Environmental Bills of Rights .............................................. 478
Chris Tollefson, Jerry DeMarco & Darlene Gilliland, “Towards a Costs Jurisprudence in Public Interest Litigation” ............................................................................. 479
Notes and Questions ............................................................................ 481
Private Prosecutions ................................................................................... 482
Keith Ferguson, “Challenging the Intervention and Stay of an Environmental Private Prosecution” ................................................... 483
Kostuch v. Alberta (Attorney General) ..................................................... 485
Notes and Questions ............................................................................ 489

References and Further Readings ........................................................................ 490

Chapter 6 Judicial Review of Environmental Decision-making.................. 493
Introduction.............................................................................................. 493
Part I — Administrative Decision-making and Judicial Review in the Environmental Law Context ......................................................... 494
Administrative Decision-making, Appeals and Architecture ......................... 494
Mark Haddock, Environmental Tribunals in British Columbia ...................... 495
Notes and Questions ............................................................................ 501
Judicial Review .......................................................................................... 501
Background and Overview ..................................................................... 501
Dunsmuir v. New Brunswick ..................................................................... 503
Georgia Strait Alliance v. Canada (Minister of Fisheries & Oceans) ............ 504

Part II — Standard of Review: Dunsmuir and the Environmental Case Law ...... 505
Introduction.............................................................................................. 505
Dunsmuir v. New Brunswick ..................................................................... 505
Justice David Stratas, “The Canadian Law of Judicial Review:
A Plea for Doctrinal Coherence and Consistency” ..................................... 507
Notes and Questions ............................................................................ 510
Wilson v. Atomic Energy of Canada Ltd. .................................................. 510
Notes and Questions ............................................................................ 517

Standard of Review in the Environmental Law Context................................. 517
Grand Riverkeeper, Labrador Inc. v. Canada (Attorney General) ................. 517
Notes and Questions ............................................................................ 520
Greenpeace Canada v. Canada (Attorney General) ...................................... 521
Notes and Questions ............................................................................ 524
Jason MacLean & Chris Tollefson, “Climate-Proofing Judicial
Review after Paris: Judicial Competence and Courage” ............................. 525
Notes and Questions ............................................................................ 528
Dene Tha’ First Nation v. Canada (Minister of Environment) ...................... 529
Notes and Questions ............................................................................ 531

Part III — Grounds for Judicial Review ......................................................... 531
Reliance on Irrelevant Considerations/Fettering Discretion............................... 532
Wimpey Western Ltd. v. Alberta (Department of the Environment) .............. 532
Imperial Oil Ltd. v. British Columbia (Ministry of Water, Land &
Air Protection) ..................................................................................... 534
# TABLE OF CONTENTS

**Part I — Introducing Federal EA** .......................................................... 594

**Part II — The Original Canadian Environmental Assessment Act (CEAA 1995)** … 597

Introduction........................................................................................................ 597
When Did the Act Apply? .............................................................................. 598
Scoping Basics ............................................................................................. 599
Process Options ............................................................................................ 599
Notes and Questions ..................................................................................... 603

**Part III — The Revised Canadian Environmental Assessment Act (CEAA 2012) … 603**

Introduction........................................................................................................ 603
Who Is Responsible for Federal EAs? ............................................................ 604
Triggering Process ......................................................................................... 605
Process Options and Features ..................................................................... 606
The “Standard” EA Process ......................................................................... 607
Panel Reviews ............................................................................................... 607
Decision-making ............................................................................................ 607
Scope of EA..................................................................................................... 608
Harmonization with Provincial EAs ............................................................... 609
Public Engagement in the Process ................................................................. 610
Notes and Questions ..................................................................................... 613

**Part IV — The New Federal Impact Assessment Act (IAA) … 613**

Introduction........................................................................................................ 613
Triggers, Application of the Assessment Process ........................................... 614
The Assessment Planning Process ................................................................. 615
The Standard (Agency) Assessment Process ............................................... 616
The Panel Review Process ............................................................................ 617
Harmonization ............................................................................................... 617
Strategic and Regional Assessments .............................................................. 619
Project Assessment Decision-making ........................................................... 619
Notes and Questions ..................................................................................... 621

**Part V — Next Generation EA** .............................................................. 623

Robert B. Gibson, Meinhard Doelle & John Sinclair, “Fulfilling the Promise: Basic Components of Next Generation Environmental Assessment” ........................................................................................................... 623
Notes and Questions ..................................................................................... 638

**Part VI — Selected Court Cases** .......................................................... 639

* Alberta Wilderness Assn. v. Cardinal River Coals Ltd. ................................ 640
Notes and Questions ..................................................................................... 652
* Grand Riverkeeper, Labrador Inc. v. Canada (Attorney General) ............... 652
Notes and Questions ..................................................................................... 661
* Greenpeace Canada v. Canada (Attorney General) ..................................... 658
Notes and Questions ..................................................................................... 664
* Clyde River (Hamlet) v. Petroleum Geo-Services Inc. ............................... 665
Notes and Questions ..................................................................................... 677
References and Further Readings .................................................................. 678

*Chapter 8 Parks and Protected Areas* ..................................................... 679

Introduction...................................................................................................... 679
### TABLE OF CONTENTS

**Part I — History and Overview of Parks and Protected Areas in Canada**

- Canadian Parks Council, Canadian Protected Areas Status Report 2000-2005
- Philip Dearden, “Progress and Problems in Canada’s Protected Areas: Overview of Progress, Chronic Issues and Emerging Challenges in the Early 21st Century”

**Part II — The Role of Parks and Protected Areas**

- Philip Dearden & Rick Rollins, “Parks and Protected Areas in Canada”
- Chris Malcolm, “Protected Areas: The Provincial Story”

**Part III — Current Issues and Challenges**

- Marine Conservation and Protected Areas
- Philip Dearden & Rosaline Canessa, “Marine Protected Areas”
- “Networking” Our Parks and Protected Areas System
- Philip Dearden & Jessica Dempsey, “Protected Areas in Canada: Decade of Change”
- Conflicting Mandates? Use, Preservation and Ecological Integrity in Our National Parks
  - *Canadian Parks & Wilderness Society v. Canada (Minister of Canadian Heritage)*
  - Shaun Fluker, “‘Maintaining Ecological Integrity Is Our First Priority’ — Policy Rhetoric or Practical Reality in Canada’s National Parks?”
  - A case comment on *Canadian Parks & Wilderness Society v. Canada (Minister of Canadian Heritage)"
  - Notes and Questions
- Reconciling Parks and Protected Areas Policy with Aboriginal Rights
  - *Mikisew Cree First Nation v. Canada (Minister of Canadian Heritage)*
- Notes and Questions
- Katherine Turner & Christopher Bitonti, “Conservancies in British Columbia, Canada: Bringing Together Protected Areas and First Nations’ Interests”
- Notes and Questions

**Part IV — Emerging Issues in Parks and Protected Areas Law**

- The Public Trust Doctrine
  - *Sierra Club v. Department of Interior*
- Notes and Questions
  - *Green v. Ontario*
- Notes and Questions
Reforming Ontario Parks Legislation: The Ontario Experience ......................... 737
Christopher J.A. Wilkinson, “Protected Areas Law in Ontario, Canada: Maintenance of Ecological Integrity as the Management Priority” ............ 737 Notes and Questions ................................................................. 745
References and Further Readings ................................................................ 746

Chapter 9 Species at Risk ........................................................................... 749

Introduction ............................................................................................... 749

Part I — Overview of the Magnitude and Nature of the Problem .............. 750
Kate Smallwood, A Guide to Canada’s Species at Risk Act ....................... 751
John Charles Kunich, “Preserving the Womb of the Unknown Species with Hotspots Legislation” ......................................................... 752 Notes and Questions ................................................................. 755

Part II — Species Listing under SARA ...................................................... 756
Kate Smallwood, A Guide to Canada’s Species at Risk Act ....................... 756
Arne O. Mooers et al., “Science, Policy, and Species at Risk in Canada” .... 758 Notes and Questions ................................................................. 762

Part III — Critical Habitat Designation, Recovery Strategies and Action Plans 763
Introduction ............................................................................................... 763
Arne O. Mooers et al., “Science, Policy, and Species at Risk in Canada” .... 765 Habitat Designation and Recovery Strategy Litigation ............................. 767
Alberta Wilderness Assn. v. Canada (Minister of Environment) ............... 768 Notes and Questions ................................................................. 774
Environmental Defence Canada v. Canada (Minister of Fisheries & Oceans) .................................................................................. 774 Notes and Questions ................................................................. 782
Georgia Strait Alliance v. Canada (Minister of Fisheries & Oceans) ......... 783 Notes and Questions ................................................................. 795

Part IV — Harm Prohibitions, Safety Net & Emergency Orders, and Permitting & Assessment Requirements ................................................. 795
Introduction ............................................................................................... 795
Adam v. Canada (Minister of the Environment) ......................................... 804 Notes and Questions ................................................................. 817 Centre québécois du droit de l’environnement c. Canada (Ministre de l’Environnement) ................................................................. 818 Notes and Questions ................................................................. 826 Permitting and Assessment Requirements: Sections 73-79 ....................... 826 Dyna Tuytel & Margot Venton, Challenges in Receiving SARA Protections: A Killer (Whale) Case Study ................................................. 827 Tsleil-Waututh Nation v. Canada (Attorney General) ............................... 830 Notes and Questions ................................................................. 834
**TABLE OF CONTENTS**

**Part V — Species Protection as a Governance Issue** .................................................. 834
Introduction .............................................................................................................. 834
Federalism and Biodiversity .............................................................................. 835
  A. Dan Tarlock, “Biodiversity Federalism” ...................................................... 835
  Notes and Questions ...................................................................................... 837
Species Protection Initiatives at the Provincial Level ......................................... 837
  Ecojustice Canada, Failure to Protect: Grading Canada’s Species at Risk Laws .......................................................................................... 838
  Notes and Questions ...................................................................................... 839
SARA and Provincial Land and Resource Use Decision-making .......................... 839
  0707814 BC Ltd. v. British Columbia (Assistant Regional Water Manager) ......................................................................................... 839
  Guelph (City) v. Soltys .................................................................................. 841

**Part VI — Emerging Perspectives on Species and Biodiversity Protection** ...... 848
  Notes and Questions ...................................................................................... 853
Holly Doremus, “Biodiversity and the Challenge of Saving the Ordinary” .......... 854
  Notes and Questions ...................................................................................... 857
Isabelle Deguise & Jeremy Kerr, “Protected Areas and Prospects for Endangered Species Conservation in Canada” ........................................ 858
  Notes and Questions ...................................................................................... 860

References and Further Readings ......................................................................... 860

**Chapter 10  Climate Change** ............................................................................. 863
Introduction ............................................................................................................ 863

**Part I — The International Context: United Nations Efforts on Climate Change** ... 863
Kyoto Protocol ....................................................................................................... 864
Paris Agreement ..................................................................................................... 865
  “Rapid and Far-reaching Transitions” ..................................................................... 868

**Part II — Jurisdictional, Political and Policy Issues in Climate Law** .................. 869
Climate Change and Division of Powers ............................................................... 869
  Nathalie J. Chalifour, “Canadian Climate Federalism: Parliament’s Ample Constitutional Authority to Legislate GHG Emissions through Regulations, a National Cap and Trade Program, or a National Carbon Tax” .................................................. 869
  Notes and Questions ...................................................................................... 876
Shi-Ling Hsu & Robin Elliot, “Regulating Greenhouse Gases in Canada: Constitutional and Policy Dimensions” ........................................ 877
  Notes and Questions ...................................................................................... 880

Federal Policy Responses to Climate Change ....................................................... 880
  Meinhard Doelle, adapted from “Decades of Climate Policy Failure in Canada: Can We Break the Vicious Cycle?” ........................................ 881
  Notes and Questions ...................................................................................... 885
**Notes and Questions** ............................................................................ 896
